BAYAT, BRADLEY B

ART UNIT	PAPER NUMBER
----------	--------------

3621

DATE MAILED: 08/09/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/810,758	Applicant(s) ELDRIDGE ET AL.	
	Examiner Bradley Bayat	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 54-63 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 54-63 is/are rejected.
- 7) ☒ Claim(s) 54-63 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Status of Claims

Claims 1-24 have been canceled and new claims 54-63 have been added as per applicant's preliminary amendment dated March 26, 2004. Thus, new claims 54-63 are presented for examination on the merits.

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: An automated system for designing and testing a probe card.
2. The examiner suggests that the applicant make a specific reference to the prior application(s) in the first sentence of the specification, even though it appears that the applicant has made a reference in the application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Claim Objections

Claims 54-63 are objected to because of the following informalities:

1. Applicant's wording of the claims can be read to denote that the applicant is claiming a probe card. Instead, the applicant appears to be claiming an automated system. For example, "An automated system for enabling a customer to design a probe card, said

system comprising: a server coupled to a network... Therefore, the dependent claims would follow “The system of claim...”

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). Applicant’s original claims were numbered 1-24 and upon canceling those claims in the preliminary amendment dated March 26, 2004, the applicant added new claims beginning with claim 54. The next new claim should have been numbered claim 25.
3. Appropriate correction is suggested.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 54-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant’s claims recite the following limitations, however, there is insufficient antecedent basis for these limitations in the claim:

- “said prospective customer” line 5 of claim 54.
- “said prospective customer” line 9 of claim 54.

Art Unit: 3621

- “the acceptability” line 10 of claim 54.
- “the input” line 3 of claim 55.

The examiner recommends that the applicant review each claim to ensure that all claim limitations are sufficiently supported and particularly point out and distinctly claim the subject matter that the applicant regards as the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 54-63 are rejected under 35 U.S.C. 102(e) as being anticipated by Cooke, et al. (hereinafter Cooke), U.S. Patent 6,701,474 B2.

As per the following claims, Cooke discloses:

Claim 54 (New): A probe card designed by an automated system, said system comprising: a server connectable to a network, an application operable with said server to provide functions comprising: receiving over said network from said prospective customer information describing a wafer to be tested, generating from said information-a verification package comprising a proposed design of said probe card for testing said wafer; and

Art Unit: 3621

communicating over said network with said prospective customer regarding the acceptability of said proposed probe card design (figures 1-4 and associated text).

Claim 55 (New): The probe card of Claim 54, wherein said application further provides the function of providing a graphical interface for use by said prospective customer to enable the input of said information describing a wafer to be tested (column 5, lines 1-8).

Claim 56 (New): The probe card of Claim 55, wherein said graphical interface further comprises at least one Web page (column 8).

Claim 57 (New): The probe card of Claim 54, wherein said application further provides the function of accepting an order from said prospective customer to manufacture said proposed probe card design (figure 4 and associated text).

Claim 58 (New): The probe card of Claim 54, wherein said application further provides the function of verifying said proposed probe card design (figures 4,5 and associated text).

Claim 59 (New): The probe card of Claim 54, wherein said verification package further comprises drawings of said proposed probe card design (figures 6,7 and associated text).

Claim 60 (New): The probe card of Claim 54, wherein said communicating function further comprises notifying said prospective customer of proposed modifications to said proposed probe card design (column 17, line 57-column 18, line 23).

Claim 61 (New): The probe card of Claim 58, wherein said verifying function further comprises simulating operation of said proposed probe card design (column 1, lines 13-34).

Claim 62 (New): The probe card of Claim 58, wherein said verifying function further comprises performing an automated simulation of said proposed probe card design.

Claim 63 (New): The system of Claim 58, wherein said verifying function further comprises performing a simulation based on particular specifications designated by said prospective customer (column 6, lines 40-51).

Examiner has pointed out particular references contained in the prior arts of record in the body of this action for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.

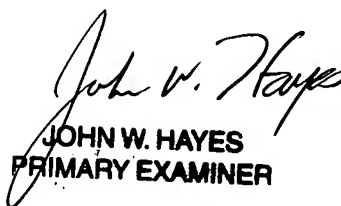

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley Bayat whose telephone number is 703-305-8548. The examiner can normally be reached on Tuesday-Friday during normal business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 703-305-9768. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
